DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to combinational stump grinder wheel, classified in class 144, subclass 24.12.
- II. Claims 9-16, drawn to a subcombinational replaceable/removable cutter block for use with a stump grinder, classified in class 144, subclass 230.
- III. Claims 17-21, drawn to a subcombinational tooth for use with a stump grinder, classified in class 144, subclass 235.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and Groups II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claim 1. The subcombinations have separate utility such as use with any stump-grinding wheel and are not limited to the stump-grinding wheel of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different search requirement(s)

Art Unit: 3725

and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
